

Contents of volume 18

July 1998 (Volume 18, Number 1)

Evaluation of a partial flow-through culture technique for pearl oyster (<i>Pinctada margaritifera</i> L.) larvae P.C. Southgate and M. Ito (Townsville, Queensland, Australia)	1
Pond water aeration systems C.E. Boyd (Auburn, AL, USA)	9
A continuous fermentation of <i>Kluyveromyces fragilis</i> for the production of a highly nutritious protein diet J.K. Kim, K.-T. Tak and J.-H. Moon (Pusan, South Korea)	41
Review of circular tank technology and management M.B. Timmons (Ithaca, NY, USA), S.T. Summerfelt (Shepherdstown, WV, USA) and B.J. Vinci (Ithaca, NY, USA)	51
Aquacultural Engineering Society	71
Guide for authors	73

August 1998 (Volume 18, Number 2)

DESTA: a software tool for selecting sites for new aquaculture facilities F. Stagnitti and C. Austin (Warrnambool, Australia)	79
Pellet wastage, and subsurface and surface feeding behaviours associated with different feeding systems in sea cage farming of salmonids K.P. Ang and R.J. Petrell (Vancouver, BC, Canada)	95
Evaluation of air-lift pump capabilities for water delivery, aeration, and degasification for application to recirculating aquaculture systems J.C. Loyless and R.F. Malone (Baton Rouge, LA, USA)	117
Effects of stocking density on behavior and growth rate of European sea bass (<i>Dicentrarchus labrax</i>) juveniles reared in a closed circulated system S.E. Papoutsoglou, G. Tziha, X. Vrettos and A. Athanasiou (Athens, Greece)	135
Announcement	145
Aquacultural Engineering Society	147

September 1998 (Volume 18, Number 3)

Live transport of gravid <i>Penaeus indicus</i> using coconut mesocarp dust M.M. Babu and M.P. Marian (Rajakkamangalam, India)	149
A bioenergetics growth model for Nile tilapia (<i>Oreochromis niloticus</i>) based on limiting nutrients and fish standing crop in fertilized ponds Y. Yi (Pathumthani, Thailand)	157
A water budget model for pond aquaculture S.S. Nath (Athens, GA, USA) and J.P. Bolte (Corvallis, OR, USA)	175

Evaluation of the nitrification rates of microbead and trickling filters in an intensive recirculating tilapia production facility A.D. Greiner and M.B. Timmons (Ithaca, NY, USA)	189
Modeling the thermal characteristics of greenhouse pond systems S. Zhu (Hangzhou, P.R. China), J. Deltour (Gembloux, Belgium) and S. Wang (Hangzhou, P.R. China)	201
Announcement	219
Aquacultural Engineering Society	221

October 1998 (Volume 18, Number 4)

Low-cost experimental unit and growth medium for testing soil effects on shrimp culture G. Ritvo (College Station, TX, Port Aransas, TX, USA), J.B. Dixon (College Station, TX, USA), T.M. Samocha, A.L. Lawrence (Port Aransas, TX, USA) and W.H. Neill (College Station, TX, USA)	245
A closer look at the bacteriology of nitrification D.S. Hagopian and J.G. Riley (Orono, ME, USA)	223
Microalgal production using a hydraulically integrated serial turbidostat algal reactor (HISTAR): a conceptual model K.A. Rusch and R.F. Malone (Baton Rouge, LA, USA)	251
Performance characteristics of fluidised bed biofilters in a novel laboratory-scale recirculation system for rainbow trout: nitrification rates, oxygen consumption and sludge collection J. Skjølstrup, P.H. Nielsen, J.-O. Frier and E. McLean (Aalborg, Denmark)	265
Announcements	277
Aquacultural Engineering Society	281
Contents of Volume 18	283
